Visa Subclass 485 — Full Work Rights in Australia

PROFILE

Computer Science graduate (Master's, University of Wollongong, November 2024) with a genuine passion for games and interactive experiences. Experienced in C++, Python, C#, and Unity game development, with a solid foundation in data structures, algorithms, and software engineering best practices. Developed a 2D Unity game from the ground up during undergraduate studies and built a real-time, cloud-integrated attendance system for a Master's Capstone. Eager to contribute to player-focused engineering at Riot Games and grow across diverse technical domains.

TECHNICAL SKILLS

Languages & Engines

C++ • C# (Unity) • Python • PHP • HTML/CSS • SQL

Game Development & Tools

Unity (2D game design, gameplay mechanics) • Git • Azure • Flask • REST APIs

Software Practices

Data Structures & Algorithms • Unit & Integration Testing • CI/CD concepts • Agile workflows • Backend service development • Database design

EDUCATION

Master of Computer Science | *University of Wollongong* *2022 – 2024*

Major: Software Engineering

- Capstone Project: QR Code-Based Attendance System — Python, Flask, SQL, PHP, Azure
- Designed secure real-time data handling and cloud integration for attendance tracking at scale

Bachelor of Computer Science | *Government Degree College Kullu* *2015 – 2018*

- Final Project: 2D Game Development in Unity (C#) — designed gameplay mechanics and interactive systems

PROJECTS

2D Game Development in Unity | C#, Unity

- Designed and implemented a complete 2D interactive game from scratch using Unity game engine
- Built gameplay loop, physics interactions, and level design focusing on player engagement and immersive mechanics
- Applied object-oriented programming patterns in C# to structure game systems and entity logic

QR Code-Based Attendance System (Capstone) | Python, Flask, SQL, Azure

- Architected a backend service with Python and Flask to process real-time QR scan events and update a cloud-hosted SQL database
- Implemented secure data storage and seamless API integration — analogous to building shared platform features for client systems
- Deployed on Azure with focus on reliability and data integrity at scale

WORK EXPERIENCE

Retail Sales & IT Support | *Cignall* *Aug 2024 – Present*

- Provided IT and digital support for internal systems, troubleshooting hardware/software issues in a fast-paced environment

- Led a team of 20 employees, managing schedules and coordinating operations — demonstrated leadership and communication skills
- Identified patterns in data and adjusted strategies to improve service delivery, developing an analytical mindset

Service Team Member | *Coles* *Apr 2022 – Present*

- Collaborated cross-functionally within a team to deliver excellent customer outcomes under high-volume, time-pressured conditions

Office & IT Supervisor | *Zenith Event & Services* *Dec 2018 – Dec 2021*

- Supervised IT infrastructure and office systems for 50 employees, managing hardware, software, and data operations
- Trained staff in office software and operational procedures, developing strong communication and documentation skills

CERTIFICATIONS

- Web Designing & Development Certificate — 2015/2016
- Workshop on Online Safety | Social Surfing 3.0

WHY RIOT GAMES

Games are not just a professional interest — they are a lifelong passion. From building my first Unity game during my Bachelor's degree to following the competitive ecosystems of League of Legends and VALORANT, I deeply understand and care about player experience. I am excited by the opportunity to contribute engineering solutions that directly improve how players engage with the games they love.
